PRECORE GOLD

CSE: PRCG

# Why Invest in Precore Gold Corp

## Precore Gold Corp. – Investment Highlights

01

**MAXIMIZING SHAREHOLDER VALUE**

Emphasis on delivering returns during favorable gold market conditions.

02

**PROVEN LEADERSHIP**

Experienced board and advisors with history of discovering and advancing top-tier gold projects.

03

**PRIME PROJECT LOCATIONS**

Diverse assets located in stable, mining-friendly Tier-1 jurisdictions.

04

**STRONG OWNERSHIP STRUCTURE**

Focus on capital management minimizing dilution and strong insider commitment.

## Executive Management, Board of Directors & Technical Advisory

**PAUL A. DUMAS**
Executive Chairman

OSISKO METALS

**MICHAEL DAKE**
President, CEO & Director

PURE ENERGY MINERALS

**CHRISTINA LALLI, CPIR**
Vice President Investor Relations

TRX GOLD

**CLAUDE CHARRON**
Director

OSISKO METALS

**LOUIS GARIÉPY, P. Eng**
Director

O3 Mining
AN OSISKO GROUP COMPANY

**JACQUES TROTTIER, PHD**
Lead Technical Advisor
(1955-2026)

AMEX EXPLORATION

**MARTIN NICOLETTI**
Chief Financial Officer

corporation financière SKTM financial corporation

**ROBERT HORSLEY**
Director

**PRECORE GOLD**

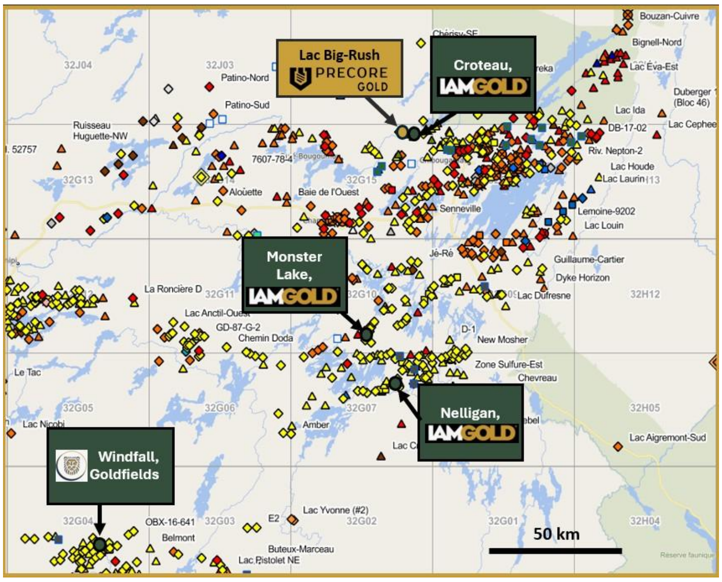
## The Arikepay Project – Arequipa, Peru

Map of Arikepay Project location within the regional geology setting

- Option agreement with Alta Copper Corp. (now Fortescue Ltd.) to acquire 100% interest in the Arikepay Project.
- Agreement **entirely transacted in Canadian dollars**.
- **All terms can be accelerated** to seize on drilling successes and bullish gold prices.
- 1,800 ha, ~110 km south of the city of Arequipa in Southern Peru.
- Easily accessible elevation of 1,200 m above sea level. No flora or fauna.
- Prolific mining region with several of Peru's largest mines (45km south of Cerro Verde Cu-Mo porphyry deposit, ≥3B tonnes of ore.
- Hosts a multiphased mineralized intrusive complex within the porphyry belt system of Southern Peru.
- Multiphased complex has been recognized over an area of 2 km x 2 km and remains open laterally in all directions and at depth.
- Best historical drill intercepts in the Au-Ag-Cu diorite porphyry include:
  - **420 m @0.91 g/t Au**, 1.16 g/t Ag, 0.04% Cu **from 30 m in hole AK-DDH-02-17**; including **81 m @ 3.17 g/t Au**, 2.12 g/t Ag, 0.07% Cu from 342 m.*

*Best historical drill intercept at Arikepay Project (Source: Enrique Bernuy 2020)

## The Lac Big-Rush Project – Chibougamau, Quebec



Map of Lac Big-Rush property location among major deposits in Chibougamau, Quebec

- 100% interest in Lac Big-Rush; 49 claims, 2,712 hectares.
- ~32km from town of Chibougamau, access year-round via highway 113 and gravel roads.
- Chibougamau Mining Camp's total metal endowment of 1.6 billion pounds copper and 3.2 Moz gold mined since the 1950s, mostly from underground mines[1].
- 300 m from Iamgold's Croteau deposit (640,000 oz at 1.73 g/t) (recent acquisition of Northern Superior by Iamgold to create the "Nelligan Mining Complex".[2]
- Limited exploration work performed since 1950s and early 1980s, when Noranda drilled approximately 10 diamond drill holes.
- Two historical gold showings, Tadd and Croteau West, are listed in the Province Sigeom database:
  - The Tadd showing: 2.3 meters wide mineralized quartz vein over 50 meters of strike length. Two drilled results returned 7.2 and 5.3 grams per ton over 0.7 metres from DDH BG 84-4 (Sigeom).
  - The Croteau showing: about 2.6km east of the Tadd showing is an outcropping mineralized occurrence. A channel sample returned 3 g/t Au over 1.5 meters in 2018 (assessment report GM-71214).

## Forward Looking Statements

This fact sheet contains forward-looking statements. All statements, other than of historical facts, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future including, without limitation, future geological work or exploration programs, the potential positive exploration results, the timing of the exploration results, the ability of the Company to finance exploration programs and the potential mineralization or potential mineral resources are forward-looking statements. Forward-looking statements are generally identifiable by use of the words "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "intend", "to earn", "to have', "plan" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's ability to control or predict, that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements. Factors that could cause actual results or events to differ materially from current expectations include, among other things, failure to meet expected, estimated or planned exploration expenditures, failure to establish estimated mineral resources, the possibility that future exploration results will not be consistent with the Company's expectations, general business and economic conditions, changes in world gold markets, sufficient labour and equipment being available, changes in laws and permitting requirements, unanticipated weather changes, title disputes and claims, environmental risks as well as those risks identified in the Company's annual Management's Discussion and Analysis. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those described and accordingly, readers should not place undue reliance on forward-looking statements. Although the Company has attempted to identify important risks, uncertainties and factors which could cause actual results to differ materially, there may be others that cause results not to be as anticipated, estimated or intended. The Company does not intend, and does not assume any obligation, to update these forward-looking statements except as otherwise required by applicable law.

Neither the Canadian Securities Exchange nor its Regulation Services Provider accepts responsibility for the adequacy or accuracy of this release.

### Qualified Person

The scientific and technical content contained within this corporate presentation has been reviewed and approved by Mr. Louis Gariépy, P.Eng (OIQ #107538), Lead Technical Advisor of PrecoreGold, who is a "qualified person" within the meaning of National Instrument 43-101 – Standards of Disclosure for Mineral Projects.
